# HOUSING CHOICE VOUCHER PROGRAM

## LANDLORD'S GUIDE TO PROGRAM SUCCESS

Program Participation is as easy as 1, 2, 3!!!!

### 1. GET READY!

- ❖ Select a good tenant. Screen your Housing Voucher tenant just like any other tenant.
- ❖ Submit paperwork. Submit inspection request form (RFTA), lease and other documents.
- ❖ Make your unit ready. Clean and repair your rental unit so that it is ready for inspection and occupancy.

### 2. GET SET!

- ❖ Be present at the inspection. Learn if repairs are needed and make them immediately
- ❖ Charge a fair rent. Agree to a rent that is no more than the rent you charge the non-subsidized tenants and others in the market area for similar rents. **(Side payments in addition to the agreed rent are illegal.)**
- ❖ Make sure to sign and submit your rent subsidy contract documents.

### 3. GO!

- ❖ Your subsidy payments will begin. The PHA will pay you the subsidy directly to you each month.
- ❖ Maintain your unit. Throughout the lease term make unit repairs as needed. Make sure your unit is ready for its annual inspection.
- ❖ Evaluate your annual rent increase. Propose a rent increase that is no greater than the rent you charge to non-subsidized tenants or the rent by others to non-subsidized tenants in the market area.

## Housing Choice Voucher Program

The Housing Choice Voucher Program is the federal government's major program for assisting very low income families, elderly and the disabled to afford decent, safe, and sanitary housing in the private market. Since housing assistance is provided on behalf of the family or individual, participants are able to find their own housing including single family homes, townhomes, and apartments.

The participant is free to choose any type of housing that meets the requirements of the program and is not limited to units located in subsidized housing development. Housing Choice Vouchers are administered locally by public housing agencies (PHA's). The PHA's receive federal funds from the U.S. Department of Housing Urban Development (HUD) to administer the voucher program.

# WHAT THE INSPECTOR LOOKS FOR

## INTERIOR OF BUILDING

1. **Electricity:** There must be two outlets in a room, or one outlet plus a permanently installed ceiling or light fixture. Both of the outlets and/or the light must be working.
2. **Electrical Hazards:** The dwelling unit will fail if any electrical hazards exist, (i.e. broken wiring, non-insulated wiring, frayed wiring, improper types of wiring, connections, or insulation, wires lying in or located near standing water or other unsafe places, light fixture hanging from electrical wiring without other firm support or fixture, missing or damaged cover plates, switches, outlets, GFI's, exposed fuse box connections, over-loaded circuits evidenced by regularly "blown" fuses).
3. **Security:** All windows must have security locks. All windows that are designed to be opened must be able to do so. All units require smoke detectors on each level of the dwelling.
4. **Window Condition:** The window should have the capacity to keep out the wind, rain and other elements and should not pose a cutting hazard, (i.e. missing or broken panes, dangerously loose, cracked panes, windows that will not close, windows that when closed, do not form a tight seal against the elements).
5. **Ceiling Condition:** The presence of such serious defects that either posts a potential for structural collapse or that large cracks or holes allow significant drafts to enter the unit, will cause a fail rating. These conditions include: severe bulging or buckling large holes, missing parts, falling or in danger of falling loose surface materials.
6. **Wall Condition:** Serious defects, such that the structural safety of the building is threatened, such as severe bucking, or leaning, damaged or loose structural members, large holes, air infiltration, chipping and/or peeling paint, lose or broken plaster, lose or hanging wall coverings. Any of these conditions will cause a fail rate.
7. **Floor Condition:** The floors should free from the presence of any serious defects(s) that create a potential for structural collapse, or other threats to safety. Large cracks or holes that allow substantial drafts to enter the unit from below the floor will result in a fail rating. Serious defects include: sever buckling or major movements under the walking stress, damaged or missing parts, torn or ripped floor covering, severely stained floor covering, hardwood floors that show signs of deterioration or splintering.
8. **Lead Base Paint:** This requirement applies to all painted interior surfaces within the unit (including ceiling, window pane) that are chipped, peeling, or cracked. In case of fail rating, the Owner will be required to make repairs in **ACCORDANCE TO EPA REGULATIONS**. In order to fail, the paint must be noticeably loose and separating from the surface material.
9. **Adequacy of Heating Equipment:** The heating system must be capable of delivering enough heat at assure a health environment. There must be an approved and adequate means to provide heat for upper areas in multi-level dwellings.
10. **Safety of Heating Equipment:** "Un-vented, fuel burning space heaters" are unacceptable. These include: portable kerosene units or un-vented open-flame portable units. On any gravity type furnaces that have been converted to gas, there must be safety springs to catches installed on furnace door(s).
11. **Ventilation and Adequacy of Cooling:** If there is no "working cooling equipment", then there must be other types of ventilation, (i.e. a window that can be opened, or a door with a screen).

12. **Hot Water Heater:** The location of the heater cannot present a hazard. This means that the gas or oil water heater is not to be located in living areas or closets where safety hazards may exist. Water heaters must have a temperature-pressure relief valve and a discharge line.
13. **Plumbing:** No major leaks or corrosion should be evident.
14. **Exits:** An “acceptable fire exit” must be present. This means that the building must have an alternate means of exit, in case of fire, that meets local or state regulations.
15. **Evidence of Infestation:** The presence of rats, or severe infestation by mice or vermin (such as roaches) as evidenced by holes, droppings, runs, or numerous setting of rodent poisonings, will warrant a fail rating.
16. **Garbage and Debris:** Heavy accumulation (large piles of trash and refuse, discard furniture, etc.) of any debris that may harbor rodents will cause the dwelling to fail.
17. **Refuse Disposal:** Adequately covered facilities (trash cans with lids, garbage chutes, dumpster) must be present.
18. **Interior Stairs and Common Halls:** Loose, broken, or missing steps will cause a unit to fail if they present a risk of tripping or falling. A handrail is required on extended sections or stairs, four (4) or more steps. A railing is required on unprotected heights, such as around stairwells.
19. **Site and Neighborhood Conditions:** Unacceptable are conditions that would endanger the health or safety of the resident(s). This also includes accessory buildings, such as garages or storage sheds.

#### **EXTERIOR OF BUILDING**

1. **Condition of Foundation:** Unsound or hazardous foundations with structural defects, indicating the potential for structural collapse, or foundations that allow significant entry of ground water, as evidenced by frequent basement flooding, will warrant a fail rating.
2. **Conditions of Stairs, Rails, and Porches:** Defects, such as structural, rotting or missing steps, or the absence of a handrail where required, will cause the dwelling to fail.
3. **Condition of Roof and Gutters:** An unsound and hazardous roof that has defects, such as severe bucking or sagging, indication of potential structural collapse, large holes, or other defects that would result in significant air or water infiltration, will warrant a failing evaluation. As well as guttering and downspouts that are rotted or loose.
4. **Condition of Chimney:** The chimney should not be leaning or show evidence of disintegration.
5. **Lead Based Paint on Exterior Surfaces:** See description of lead base paint under interior. Also, includes porches, rails, handrails, support columns, house structure and accessory buildings.

# SECURITY DEPOSIT REQUIREMENTS

## Housing Choice Voucher Program

Under the Housing Choice Voucher Program, an Owner may collect a security deposit in the amount of one (1) month's contract rent. The amount of the security deposit (if the tenant is leasing-in-place) may remain with whatever deposit amount originally collected by the Owner.

## Landlord Requirements

In the Housing Choice Voucher Program, when the tenant moves from the dwelling unit, the Owner (subject to State and Local Laws) may use the security deposit, including any interest on the deposit, in accordance with the lease as reimbursement for any unpaid rent payable by the tenant, damages to the unit or for other amounts the tenant owes under the lease.

The Owner must give the tenant a written itemized listing of all items charged against the security deposit and the amount of each item. After deducting the amount used to reimburse the Owner, the Owner must promptly refund the full amount of the unused balance to the tenant.

If the security deposit is not sufficient to cover amounts the tenant owes under the lease, the Owner may seek to collect the balance from the tenant.

## REQUEST FOR TENANCY APPROVAL (RFTA) PROCESS

The Request for Tenancy Approval (RFTA) is the form that the family initially provides to the Landlord. Once the family and Landlord agree to rental terms, the unit must be approved by the PHA. The Landlord will complete the RFTA, with information about the unit such as number of bedrooms, rent amount, security deposit amount, availability, address, and utility responsibility. The family or Landlord may submit the RFTA to the PHA. Any missing data will delay the processing.

After receiving the RFTA, a Leasing Specialist will verify that the proposed rental agreement meets the family's subsidy limit (tenant portion of rent cannot exceed 40% of the household's income). These calculations depend in part on utility information submitted for inspection. If it does not meet these requirements the PHA will notify the Landlord that they will need to lower the proposed rent, they are under no obligation to accept these terms and can terminate the process.

### NOTE:

- The RFTA form must be signed by both the Owner and the voucher holder.
- The PHA will not permit the Landlord or family to submit more than one RFTA at a time.
- Only original RFTA packets will be accepted (NO copies or faxes).
- If you are a new Landlord to the program you must submit a blank lease, for review and approval by Section 8 and a completed W-9 form at the time the RFTA is submitted to the office.

## HOUSING ASSISTANCE PAYMENT CONTRACT & LEASE SIGNING

The HAP contract is a written agreement between the PHA and the Owner of the unit that will be occupied by a Housing Choice Voucher program participant. The HAP contract must be in the form prescribed by HUD (Housing and Urban Development). Under the HAP contract, the PHA agrees to make housing assistance payments to the Owner on behalf of the participant family leasing a specific unit.

The term of the HAP contract must run concurrently with the term of the lease. In some cases a family may already be in a unit prior to HAP execution (lease in place) and has already signed a lease with the Owner. In this situation the PHA must request that the Owner and tenant sign a new lease so that the HAP contract and lease can be executed simultaneously.

After the HAP contract and lease are signed the PHA makes the initial HAP payment and continues to make monthly payments to the Owner as long as the family continues to meet eligibility criteria, the housing unit continues to meet housing quality standards, the tenant resides in the unit and the Owner is in compliance with the HAP contract.

The portion of the rent to the Owner that the tenant pays may not be more than the difference between the rent to Owner and the housing assistance payment. The Owner may not demand or accept any excess payments from the tenant and must return any such payments to the tenant.

The family is not responsible for payment of the portion of rent to the Owner covered by the housing assistance payment. The PHA, likewise is not responsible for any portion of the family share, including family rent to Owner.

## **PEORIA HOUSING AUTHORITY PROCEDURES – Housing Choice Voucher**

### **REQUEST FOR RENT INCREASE:**

1. The Landlord must notify the participant of the new rental amount in writing **60 days** prior to the HAP Contract anniversary date, and the participant must respond in writing, approving the request. The notice must spell out the new rental amount and the effective date. The signature of both parties must be on the notice and the notice must be dated.
2. The current year annual inspection must be completed prior to initiating a rent increase.
3. The Landlord is to submit a copy of the notice to the Department Manager, at which time it will be given to the Leasing Specialist, who will document the participant file.
4. The Leasing Specialist will issue a Rent Reasonableness Worksheet to the Inspector. An inspection is not required if the current annual inspection has been completed.
5. The inspector will complete the worksheet along with comparables to validate the new requested amount and forward both to the Manager and the Leasing Specialist. The Manager's copies are placed in the Landlord file, and the Specialist's copies are placed in the participant's file.
6. A new HAP contract will not be signed, however, the Leasing Specialist must place a copy of Rental Increase Addendum in the participant's file following the procedures as directed by the sample file.

If the Inspector deems the new increase is not reasonable the reason(s) must be documented. The Manager will forward a letter to the Landlord notifying him/her that the request is denied. Both parties must sign off on a Rental Increase Addendum.
